Project Report: Digital Literacy Portfolio

Name: [Kislay Kumar]

Registration No: [25BAI10313]

Branch: [Btech CSE (AIML)]

Year: First Year

Course Code: CSE0001

Date: October 2023

Introduction

This project was completed as part of the Student Digital Ambassador program. The goal was to develop a comprehensive digital portfolio that demonstrates proficiency in professional online presence, secure communication, and cyber awareness. Over five modules, I have documented my journey in setting up professional profiles, practicing coding, and researching digital safety.

Task 1 Write-up: Digital Literacy Infographic

For this task, I created a visual resource using **Canva** to explain the pillars of digital literacy to my peers. The infographic highlights three main areas: the definition of digital literacy, essential tools for students, and safe internet practices like Multi-Factor Authentication.

Task 2 Write-up: Digital Student Portfolio

I established my professional presence on **GitHub**, **LinkedIn**, and **Kaggle**. I set up a GitHub README profile to showcase my academic interests and updated my LinkedIn with my current degree details at VIT Bhopal.

Task 3 Write-up: Coding & Collaboration Platforms

In this task, I practiced technical problem-solving on **HackerRank** by completing the "Solve Me First" Python challenge. Additionally, I built a 5-question "Digital Literacy Quiz" using **Google Forms** and linked it to a **Google Sheet** to track responses.

Task 4 Write-up: Email Etiquette & Social Media

I drafted two professional emails: one requesting an assignment extension and another inquiring about an internship. I also developed a "Social Media Do’s and Don’ts" checklist to guide responsible online behavior.

Task 5 Write-up: Cybercrime Awareness

I researched a case study on **Phishing** and created an 8-point "Stay Safe Online" checklist, emphasizing UPI safety and the National Cyber Crime reporting portal (1930).

Conclusion

This project has significantly improved my digital confidence. I have transitioned from being a passive consumer of technology to an active, professional participant in the digital world. I am now equipped with a professional portfolio and the safety knowledge required to navigate my four-year degree securely.
